

# EXPLOSIVES TRAINS

Just as your average boy scout constructs a fire using initially some very fine kindling, then some slightly larger twigs then once the fire is established he put on bigger sticks and then logs and he sits back and enjoys his fire, so too with your explosives engineer. He puts together small quantities of sensitive explosives with a slightly larger quantity of less sensitive explosives and once the detonation process is established he adds a large quantity of insensitive explosive and he then sits back and enjoys the results of his..... Explosive Train.

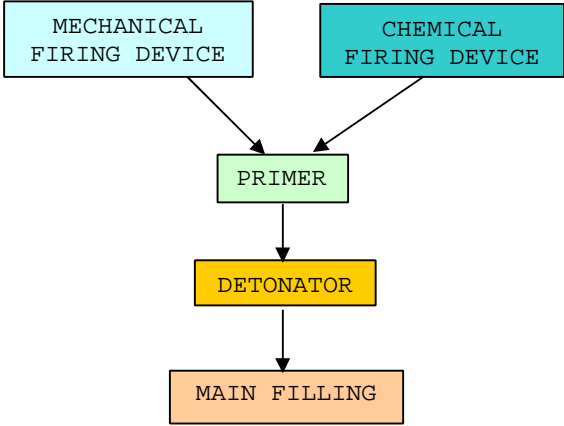

Shown below are some of your basic explosives trains.

DEMOLITION CHARGE GENERALLY

MINE A-PERS OR A-TK

BOUNDING A-PERS MINE
