

## .30-06 CARTRIDGES

Australia at some time must have considered making her own 30-06 ammunition, as there exist examples of Australian headstamped cartridges in this calibre. Any information that you might have concerning this cartridge would be most appreciated.

The projectile looks suspiciously similar to our standard 7.62mm. It measures 7.81mm (.308in) in diameter and weighs in at 9.52 gms (147gns) and its length is 28.74mm (1.13in.).
