

38 SPECIAL CARTRIDGES

This cartridge is another oddity for Australia. As far as I know we have never used it as a military cartridge except possibly by the SAS regiment. The “C” in the wadcutter headstamp I think is a fair guess at a commercial cartridge. I am open to suggestions on this one. Any information concerning this cartridge would be most appreciated.

38 SPL. Cartridge made at MF. Case is single flash hole. Projectile is round nosed and full metal jacketed.

38 SPL. Made at MF, C in Headstamp may indicate Commercial, Projectile is wadcutter

Top is the full metal jacketed .38 special and the bottom is the wadcutter.
