

AUSTRALIAN PROPELLANT CODES

AR 2201 is decoded in the following manner.

AR = Australian Rifle

First number = grain shape according to the following:

- 1 = Tube shaped
- 2 = disk shaped
- 3 = porous

Second number= Moderant to controll rate of burning according to the following:

- 1 = Dinitrotoluene
- 2 = Methyl Centralite
- 3 = Carbamite

Last two numbers indicate that it is a single base powder in a series from 0 to 49. Thus you may readily see that AR 2201 was:

Tube shaped, moderated by DNT and was the first in the series of single base propellant.
