

7.62 x 51 TRACERS

Australia commenced production of tracer ammunition in 1969 with the cartridge 7.62 Tracer F3. This was identified by the application of a red tip. Australia produced tracer cartridges during the years 1969 to 1973, Israel supplied any tracer used thereafter. It is believed that we cannot produce a tracer that is cost effective considering the quantities we use. We can purchase them more cheaply than we can make them. If you have any information concerning this cartridge we would be pleased to hear from you.

69	70	71	72	73

Standard packet for 7.62mm Tracer cartridges.
