

## 8mm SOLOTHURN

This cartridge is also known as the 8mm Hungarian Mannlicher as it was adopted by Hungary in 1931. It was also adopted by Bulgaria in 1934. It was originally designed for use in the Austrian 8mm 30S machine gun.

The headstamps are interesting as the one on the left shows the Waffenamt swastika acceptance mark because by the date on it the Hungarians weren't independent of Germany. The one on the right shows the Cyrillic letters for Voenna Fabrik ( Army Factory)
