

6 INCH BEEHIVE

This demolition store weighs 4.53kg and contains 3.06 Kg. of Pentolite. The charge is 152.4 mm in diameter with a length of 177.8 mm and it is fitted with three legs 114.3mm long to provide the correct stand off distance to allow maximum performance of the hollow charge. The charge is lined with a steel cone with an angle of 80°.

The top of the charge is fitted with a cap providing access to the primers for insertion of the detonators.

It was used as a demolition charge for destroying bridges and culverts and could also be used as a penetration charge for concrete bunkers.
