

30lb incendiary bomb Mk III

This bomb was filled with a mixture of rubber and benzol? (petrol ?) and it weighed 11.3kg.

Benzene, or **Benzol** is an organic chemical compound with the formula C_6H_6 . It is sometimes abbreviated Ph-H. Benzene is a colorless and highly flammable liquid with a sweet smell and a relatively high melting point. It is carcinogenic and its use as an additive in gasoline is now limited, but it is an important industrial solvent and precursor in the production of drugs, plastics, synthetic rubber, and dyes. Benzene is a natural constituent of crude oil, but it is usually synthesized from other compounds present in petroleum.
