

Fuze percussion DA L17A3

This fuze was used in 76mm armoured car gun HE-T projectile.

ACTION.

On firing the detent sets back compressing its spring, this action frees the shutter which moves into the armed position when acceleration ceases. In this particular fuze the shutter is also prevented from moving by a toggle spring to allow a safety arming distance. On impact the firing pin is driven into the detonator which commences the detonation of the shell.
